N1 = Homologated for goods transport  M1 = Homologated for passenger transport

Maximum payload figures includes driver and is subject to change dependant on variances in features, options and trim levels.
*With Robotized Gearbox

The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle.
Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

## TRIM LEVELS

### CARGO

#### STANDARD

**COMFORT & INFOTAINMENT**
- Radio / CD player basic
- High performance loudspeakers
- Electric windows
- Manually adjustable door mirrors
- Height adjustable steering wheel
- Deadlock
- Power steering
- Passenger seat undertray

**BODY & MECHANICAL**
- Panelled bulkhead
- Near-side sliding side door
- Twin panelled rear doors (full height)
- 15" wheels
- Full width wheel trim covers
- External temperature sensor & display
- Ceiling mounted storage shelf
- Heated diesel filter
- Locking fuel cap
- Side rubbing strips
- 12v front plug in socket

**SAFETY & SECURITY**
- Remote control central locking
- ABS
- Hill holder system
- Driver air bag
- ESC (electronic stability control)
- Adjustable headlights
- Speed limiter**
- "Fix & go" tyre repair kit*

#### ECOJET

(In addition to "STANDARD") +£400

**BODY & MECHANICAL**
- Start & stop
- Smart alternator management
- Variable displacement oil pump
- Low-friction oil pump
- Low-rolling resistance tyres

#### SX

(In addition to "STANDARD") +£450

**COMFORT & INFOTAINMENT**
- Radio / CD / mp3 player high

**BODY & MECHANICAL**
- Bulkhead soundproofing
- Load area PVC lining
- Electric mirrors heated
- Body-coloured mirrors
- Single passenger seat with storage in cushion
- Height adjustable driver's seat & lumber support

**SAFETY & SECURITY**
- Fog lights

#### TECNICO

(In addition to "SX") +£850

**COMFORT & INFOTAINMENT**
- Radio cd / MP3 / USB with Bluetooth®
- Sat nav & TomTom predisposition
- Radio controls on steering wheel
- Reverse parking sensors
- Cruise control
- Air conditioning

#### SPORTIVO

(In addition to "TECNICO") +£650

**COMFORT & INFOTAINMENT**
- Leather steering wheel & gear knob

**BODY & MECHANICAL**
- Alloy wheels 15'' (16'' on Maxi)
- Body-coloured bumpers
- Black Metallic paint
- Mirrors: folding heated electric door mirrors

### COMBI

#### ACTIVE

**COMFORT & INFOTAINMENT**
- Radio / CD player basic
- High performance loudspeakers
- Electric front windows
- Manually adjustable door mirrors
- Height adjustable steering wheel
- Deadlock
- Power steering
- Passenger seat undertray

**BODY & MECHANICAL**
- Near-side sliding side door
- 2nd sliding side door - offside (panelled)
- Glazed tailgate
- 15" wheels
- Full width wheel trim covers
- External temperature sensor & display
- Ceiling mounted storage shelf
- Heated diesel filter
- Locking fuel cap
- Side rubbing strips
- Front and rear 12v socket
- Loading bay cover
- Split rear seat

**SAFETY & SECURITY**
- Remote control central locking
- ABS
- Hill holder system
- Driver air bag
- ESC (electronic stability control)
- Adjustable headlights
- Speed limiter
- Rear seat head restraints
- "Fix & go" tyre repair kit*

#### SX

(In addition to "ACTIVE") +£600

**COMFORT & INFOTAINMENT**
- Radio / CD / mp3 player
- Electric front and rear windows
- Height adjustable driver's seat & lumber support

**BODY & MECHANICAL**
- Electric mirrors heated
- Body coloured mirrors
- Single passenger seat with storage in cushion

**SAFETY & SECURITY**
- Fog lights
- Driver and passenger air bag

### CREW VAN

#### ACTIVE

**COMFORT & INFOTAINMENT**
- Radio / CD player basic
- High performance loudspeakers
- Electric front windows
- Manually adjustable door mirrors
- Height adjustable steering wheel
- Deadlock
- Power steering
- Passenger seat undertray

**BODY & MECHANICAL**
- Near-side sliding side door
- 2nd sliding side door - offside (panelled)
- Twin panelled rear doors (full height)
- 15" wheels
- Full width wheel trim covers
- External temperature sensor & display
- Ceiling mounted storage shelf
- Heated diesel filter
- Locking fuel cap
- Side rubbing strips
- Front and rear 12v socket
- Loading bay cover
- Split rear seat

**SAFETY & SECURITY**
- Remote control central locking
- ABS
- Hill holder system
- Driver air bag
- ESC (electronic stability control)
- Adjustable headlights
- Speed limiter
- Rear seat head restraints
- "Fix & go" tyre repair kit*

* N/A when ordered with spare wheel

**Available 56 / 62 / 70 / 81 MPH - set in workshop

N1 = Homologated for goods transport / M1 = homologated for passengers transport

(+) with High Roof (option 360) * Maximum payload figures includes driver and is subject to change dependant on variances in features, options and trim levels.

** With major Payload (option 943) ***Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).

The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres. Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle.

Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable

* Maximum payload figures includes driver and is subject to change dependant on variances in features, options and trim levels.
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle.
Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such

* Maximum payload figures includes driver and is subject to change dependant on variances in features, options and trim levels.
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle.
Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

N1 = Homologated for goods transport / M1 = homologated for passengers transport

*Kerb weight is affected by many factors such as bodystyles, engines and options. It is the weight of a standard-specification base series vehicle, including fluids and approximately 10 litres of fuel. It does not include the driver 75 (kg), crew or cargo **Payload within this guide is the difference between gross vehicle weight (GVW) and kerb weight. Payload includes the driver 75 (kg). It must be taken into account that actual weight will always be subject to manufacturing tolerances which may result in payload variations between this guide and actual weight. For customers intending to load the vehicle close to the maximum payload, we recommend you also add 5% of kerb mass to the kerb weight figure to reduce the risk of overloading. N
B: It is the responsibility of the vehicle operator to ensure their vehicle is legally compliant for road use

Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

N1 = Homologated for goods transport / M1 = homologated for passengers transport

*Payload within this guide is the difference between gross vehicle weight (GVW) and kerb weight. Payload includes the driver 75 (kg). It must be taken into account that actual weight will always be subject to manufacturing tolerances which may result in payload variations between this guide and actual weight. For customers intending to load the vehicle close to the maximum payload, we recommend you also add 5% of kerb mass to the kerb weight figure to reduce the risk of overloading. NB: It is the responsibility of the vehicle operator to ensure their vehicle is legally compliant for road use

Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

N1 = Homologated for goods transport / M1 = homologated for passengers transport

*Kerb weight is affected by many factors such as bodystyles, engines and options. It is the weight of a standard-specification base series vehicle, including fluids and approximately 10 litres of fuel. It does not include the driver 75 (kg), crew or cargo

Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditi

N1 = Homologated for goods transport / M1 = homologated for passengers transport

*Payload within this guide is the difference between gross vehicle weight (GVW) and kerb weight. Payload includes the driver 75 (kg). It must be taken into account that actual weight will always be subject to manufacturing tolerances which may result in payload variations between this guide and actual weight. For customers intending to load the vehicle close to the maximum payload, we recommend you also add 5% of kerb mass to the kerb weight figure to reduce the risk of overloading. N B: It is the responsibility of the vehicle operator to ensure their vehicle is legally compliant for road use

Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).

The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.

Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

N1 = Homologated for goods transport / M1 = homologated for passengers transport

*Payload within this guide is the difference between gross vehicle weight (GVW) and kerb weight. Payload includes the driver 75 (kg). It must be taken into account that actual weight will always be subject to manufacturing tolerances which may result in payload variations between this guide and actual weight. For customers intending to load the vehicle close to the maximum payload, we recommend you also add 5% of kerb mass to the kerb weight figure to reduce the risk of overloading. N B: It is the responsibility of the vehicle operator to ensure their vehicle is legally compliant for road use

Fuel Consumption MPG (l/100km). (EC Regulation 715/2007 as amended by 692/2008).
The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.

The CO2 emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy of a vehicle in the class in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres.
Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle.
Fuel consumption is directly affected by the length of the journey; number of passengers and the weight of payload carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons; many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technicallycapable of doing so.
*Maximum payload figures includes driver and is subject to change based on variances in features, options and trim levels.
